Dear Hiring Manager,

I am writing to apply for the Borealis Software Engineer (Embedded/C++) position. As a Computer Science major currently participating in the College Work Experience Program (CWEP) at Lockheed Martin, I am eager about the opportunity to continue contributing to the organization in a full-time capacity. I look forward to supporting Lockheed Martin's mission to help defend people against modern threats.

My academic background and hands-on experience have prepared me well for this position. Through my coursework, I have built a strong foundation in C++, data structures, and object-oriented programming. My time in CWEP has strengthened my ability to collaborate on engineering teams, work within established development processes, and contribute to real-world defense software. Together, these experiences have equipped me with both the technical and problem-solving skills needed to contribute effectively to the Borealis program.

Lockheed Martin's commitment to innovation, mission-critical engineering, and national defense is a major reason I want to contribute to this work. Through my time in the College Work Experience Program, I have experienced the company's dedication to technical excellence, meaningful impact, and continuous learning. The Electrical-Optical Targeting System program's integration of advanced sensors and targeting capabilities reflects the kind of high-impact work where I hope to apply my skills and deliver meaningful contributions to the team.

I would be grateful for the chance to work with the EOTS team and help Lockheed Martin build a better tomorrow. Please feel free to reach out if you have any questions about my background and experience. Thank you for your time and consideration.

Sincerely,

A handwritten signature in cursive script that reads "Ilarya Franco".
